

Infection history summary

Primary and challenge infections by experimental outcome

Experimental Outcome	Primary Infection	Challenge Infection	n
Completed both infection phases	Uninfected controls	Uninfected controls	8
Completed both infection phases	Uninfected controls	<i>E. ferrisi</i>	8
Completed both infection phases	Uninfected controls	<i>E. falciformis</i>	6
Completed both infection phases	<i>E. ferrisi</i>	Uninfected controls	25
Completed both infection phases	<i>E. ferrisi</i>	<i>E. ferrisi</i>	22
Completed both infection phases	<i>E. ferrisi</i>	<i>E. falciformis</i>	9
Completed both infection phases	<i>E. falciformis</i>	Uninfected controls	14
Completed both infection phases	<i>E. falciformis</i>	<i>E. ferrisi</i>	17
Completed both infection phases	<i>E. falciformis</i>	<i>E. falciformis</i>	7
Died during primary infection	<i>E. ferrisi</i>	—	1
Died during primary infection	<i>E. ferrisi</i>	—	1
Died during primary infection	<i>E. ferrisi</i>	—	1
Died during primary infection	<i>E. falciformis</i>	—	6
Died during primary infection	<i>E. falciformis</i>	—	4
Died during primary infection	<i>E. falciformis</i>	—	7
